4

I, [REDACTED] at
[REDACTED] the City of [REDACTED]
County of [REDACTED] State of [REDACTED] ZIP code [REDACTED]
My telephone number is (area code) [REDACTED]
I have been employed by [REDACTED]
located at [REDACTED]
(number and street, city, state and ZIP code)
office telephone (area code) [REDACTED]
My job classification is/was [REDACTED]

THIS STATEMENT IS A PUBLIC RECORD AND AS SUCH IS COVERED UNDER STATUTES AND RULES ASSOCIATED WITH THE ACCESS TO PUBLIC RECORDS ACT (APRA). THIS STATEMENT IS SUBJECT TO RELEASE UNDER APRA AND IS NOT CONSIDERED A CONFIDENTIAL DOCUMENT.

I hereby dispose and say: I put the K labels on raw materials, be-
they come in. We assign them a lot number, b/c the
material's information is different. The lot number is under-
the name, it's the month, year, and the number of
containers per month. We ship intermediate and finished
goods between different divisions, but we only put labels
on raw materials. We get the truck bill/packing slip,
enter PO number into system and all of the diamond
information is already loaded. We only enter the lot
number, and the barcode, K number, and allergen number
are already loaded on the computer. The allergen number
goes from one to ten, and it is designated by the
and then the number - I'm not sure which number is worse
1 or 10. [REDACTED] material and some other

Statement of

put the K label on the allergen label on. The 12/28/10 was when the label was entered. The small diamond encloses the K label is probably the manufacturer's label or someone else put it on. I don't know why the PIR numbers on the are different. I don't take the time to match up the diamond information. I check the K number w/ the vendor label. I don't know if anyone checks to see if the numbers match up. It's Hammett if it's higher than 73 or 146. I think. The vendor puts the Hammett level diamond. I don't put our Hammett level diamond on containers. The container is a 5-gallon pail. I don't look to make sure the barrel diamond is filled out, but you have heard that Tina called Libby. I think don't the labels. We only sample things on the list and not everything like we used to. Tina and I do the sampling by removing the fung and work some of the product out in a pipette and put it into a 2 oz sample bottle and we give that to. Based on your picture, we probably sampled the, but I don't think we sample the. We do not sample b/c it's not on our list.

IC 22-8.1-24.3
I hereby dispose and say: We put the labels the raw materials. We get the DOT training all normal training everybody gets. The training is focused on [redacted] and [redacted] not so much putting labels on stuff. We try not to cover up the manufacturer's label or anything. Sometimes we have to cover up the manufacturer's label b/c the bottles are only a certain size. They have not disciplined anyone for covering up a vendor label w/ a Sensient label. The [redacted] have brought up the different numbers on the labels before. This was a couple years ago and some of them have been fixed. I have been told in the past that if the container is not leaving our facility, then we can cover up the label if we have to. We do not remove the vendor/manufacture

Someone investigate it. The products get shared to the [redacted] and stock guys take it. We don't [redacted] but years and years ago we used to. We use a pipette or spoon to sample stuff and we wear the regular rubber gloves. The spoon is mainly for powders. We have a list, they changed their rules a couple of years ago they go off C of A (Certificate of Analysis) now. The list is about 1/4 or a little more long. When doing stock work, I pay attention to the flammable things. 3 or higher goes to flammables on truck/trailers out in yard or [redacted]. Between the construction and you guys, they're trying to figure out what to do w/ all the flammables. A 3 on the flammable means it is really flammable, and we probably have some 4s but 3s are more common. The label will say refrigerant or room temperature. Before the trailers, a flammable would go to [redacted] that would be [redacted]. The trailers have been in use for I don't know how long.

Appendix F CSHO Guidance for Employee Interviews

This appendix contains some questions that may assist CSHOs during employee interviews. This is not a specific questionnaire, but these questions may help to assess possible health issues in employees in the flavoring manufacturing industry. The questions do not need to be asked verbatim, but the topics can guide the interview. It is very important to ask employees questions about a history of cough or breathing problems, and specifically ask if employees have ever been diagnosed with airways obstruction or bronchiolitis obliterans. Please be aware that the answers to some of these questions may contain privileged medical information, which must be maintained in such a manner as to ensure employee confidentiality. The CSHO should also inform the employee that he/she is not a medical professional and cannot provide medical advice, diagnosis, or treatment to the employee. The CSHO can provide the letter in Appendix B for the employee to take to his/her physician.

A. Smoking history:

1. Do you currently smoke or have you smoked in the past? (If yes, ask how many packs/day and how long has the employee smoked, and when did the employee quit.)
NO, never smoked

B. Eye and Skin Irritation

Ask the employee about eye and skin irritation, and ask if the employee associates any symptoms with workplace exposure. For example:

1. Since working at the plant, have you had any symptoms of eye irritation, such as watery eyes, red eyes, burning or itching eyes? *dryness of the eyes*
get dried out
2. Is there any exposure at work that you associate with eye irritation? *Trade Secret*
3. Have you seen a doctor for eye irritation? (If yes, ask if employee was given a specific diagnosis). *NO*
4. Since working at this plant have you developed any skin problems, such as itching, rash, eczema, blisters, or burns? *NO*
5. Is there any exposure at work that you associate with skin problems? *NO*
6. Have you seen a doctor for skin problems? (If yes, ask if employee was given a specific diagnosis). *N/A*

C. Respiratory Symptoms and History

Ask the employee about respiratory symptoms and ask if the employee associates any symptoms with workplace exposures. Be sure to specifically ask employees about breathing difficulty and coughing.

THIS STATEMENT IS A PUBLIC RECORD AND AS SUCH IS COVERED UNDER STATUTES AND RULES ASSOCIATED WITH THE ACCESS TO PUBLIC RECORDS ACT (APRA). THIS STATEMENT IS SUBJECT TO RELEASE UNDER APRA AND IS NOT CONSIDERED A CONFIDENTIAL DOCUMENT.

[REDACTED] hereby disposed [REDACTED] The Sensient label has always been different from the vendor label. I had trouble with this b/c something has 1 on Sensient's and it has a number 3 on a vendor label on the flammability and I don't know where to put it. I have talked to the safety people and [REDACTED] about the two labels being different and they said the vendor is just covering their ass. The different labels are on a lot of containers and they usually put the Sensient label over the vendor label, especially if it is a small container. I have seen the Sensient label be put over the vendor hazard diamond a lot of times. I have talked to [REDACTED] and [REDACTED] about this at least once, but it has been years ago since I have talked to them. Sensient told us to disregard the vendor label.

STATEMENT (Affirmation continued)

time spent - long enough to get stuff. Someone can
be washing it in there - they're in there as long as it
takes. has stuff w/ skull and cross bones

they're been open by factors. Smells. Don't know if anyone
is getting sick. how often - some in there
now. 4 or 5 items are constantly kept in the room.

Succeeded to come in here. Thinking about getting over eating

All the guys in

IC Trade Secret

How can

put

Trade Secret

in tanks and push tanks in the middle of

the room without ventilation Tank had lid - its covered
but not sealed. This is by the

Trade Secret

This

happens in Jumbo tanks, small tanks. All chemicals in
the dist, a batch is made. The tank is push to the
tank farm, no ventilation, tanks not sealed. Don't know -
don't know if pressure [plus] popped or fire? - no. No ventilation
in the room. Training - regarding the health hazards of

Trade Secret

or other food flavoring substances. Don't eat processed

food anymore. D

Appendix F
CSHO Guidance for Employee Interviews

This appendix contains some questions that may assist CSHOs during employee interviews. This is not a specific questionnaire, but these questions may help to assess possible health issues in employees in the flavoring manufacturing industry. The questions do not need to be asked verbatim, but the topics can guide the interview. It is very important to ask employees questions about a history of cough or breathing problems, and specifically ask if employees have ever been diagnosed with airways obstruction or bronchiolitis obliterans. Please be aware that the answers to some of these questions may contain privileged medical information, which must be maintained in such a manner as to ensure employee confidentiality. The CSHO should also inform the employee that he/she is not a medical professional and cannot provide medical advice, diagnosis, or treatment to the employee. The CSHO can provide the letter in Appendix B for the employee to take to his/her physician.

A. Smoking history:

1. Do you currently smoke or have you smoked in the past? (If yes, ask how many packs/day and how long has the employee smoked, and when did the employee quit.)

Yes - 15 years - 1 pack/day

B. Eye and Skin Irritation

Ask the employee about eye and skin irritation, and ask if the employee associates any symptoms with workplace exposure. For example:

1. Since working at the plant, have you had any symptoms of eye irritation, such as watery eyes, red eyes, burnin or itching eyes? *Yes. When working at the plant, I get watery eyes, red eyes, burnin or itching eyes. That goes away when I get home.*
2. Is there any exposure at work that you associate with eye irritation? *See above*
3. Have you seen a doctor for eye irritation? (If yes, ask if employee was given a specific diagnosis). *No. Washed eyes at eye station, and it goes away.*
4. Since working at this plant have you developed any skin problems, such as itching, rash, eczema, blisters, or burns? *No*
5. Is there any exposure at work that you associate with skin problems? *No*
6. Have you seen a doctor for skin problems? (If yes, ask if employee was given a specific diagnosis). *No*

C. Respiratory Symptoms and History

Ask the employee about respiratory symptoms and ask if the employee associates any symptoms with workplace exposures. Be sure to specifically ask employees about breathing difficulty and coughing.

D

1. Do you usually have a cough? If yes, when did the cough start? *Yes. Started - Don't know.*
2. Have you seen a doctor for your cough? (If yes, ask if employee was given a specific diagnosis). *No. Don't like Dr.*
3. Have you ever had any symptoms of wheezing when you breathe? If yes, when did the wheezing start? *Sometimes. Not sure when started. 8-10 years ago. Was bad when working at 4th (Trade Secret) (headline)*
4. Have you seen a doctor for your wheezing? (If yes, ask if employee was given a specific diagnosis). *No.*
5. Have you developed any trouble with your breathing, or do you ever feel short of breath? If yes, when did this start? *Sometimes. Started 8-10 years ago guessing*
6. How often do you have trouble with your breathing? *A few times a week.*
7. Does it ever get completely better? *Gets better when relax for a bit*
8. Do you have breathing trouble when walking up a slight hill, or going up a flight of stairs, or hurrying on level ground? (If yes, please have employee describe when they have breathing difficulty). *Yes. At top of hill I'm breathy heavy, cannot breathe*
9. Have you seen a doctor for your breathing problems? (If yes, ask if employee was given a specific diagnosis). *No.*
10. Is there any exposure at work that you associate with any of your respiratory symptoms? *Yes. (Trade Secret) /1*

Have trouble taking
air in.

Ask employee if they have a history of any lung disease. Be sure to specifically ask about any diagnosis of airways obstruction and bronchiolitis obliterans.

1. Have you ever been diagnosed by a doctor with any lung or respiratory disease? For example: bronchitis, chronic bronchitis, pneumonia, emphysema, asthma, reactive airways disease. *No*
2. If yes, what is your diagnosis and when were you diagnosed? *N/A*
3. If yes, are you currently seeing a physician for this condition? *N/A*
4. Have you ever been told by a doctor that you had airways obstruction or bronchiolitis obliterans? *No*
5. Have you ever been told you had a lung disease or lung condition related to workplace exposures, including exposure to food flavorings containing diacetyl? *No. no doctor 7 yrs*

Ask employee about former co-workers who developed respiratory illnesses.

D

Document Request Form #2

Sensient Flavorings

1. A detailed list of ALL PRODUCTS, INTERMEDIATES AND OTHERWISE USED OR MANUFACTURED BY THE EMPLOYER that contain any of the following food flavorings and/or chemicals:

Trade Secret

2. Quantities and percentages for each of the chemicals (Ingredients) listed in Item 1 FOR EACH PRODUCT, INTERMEDIATE(S) AND OTHERWISE USED OR MANUFACTURED BY THE EMPLOYER (For Example: Trade Secret used per Batch). Also, need to know which forms (powder, liquid, etc.) these ingredients are used in each product, intermediate(s) and otherwise.

3. List of which area(s) these products are manufactured including which shift(s) they are or could be manufactured on.
